CORPORATE PROFILE

ALJOUDEE
Marine & Steel Constructions

www.aljoudeemarine.com

Founder :

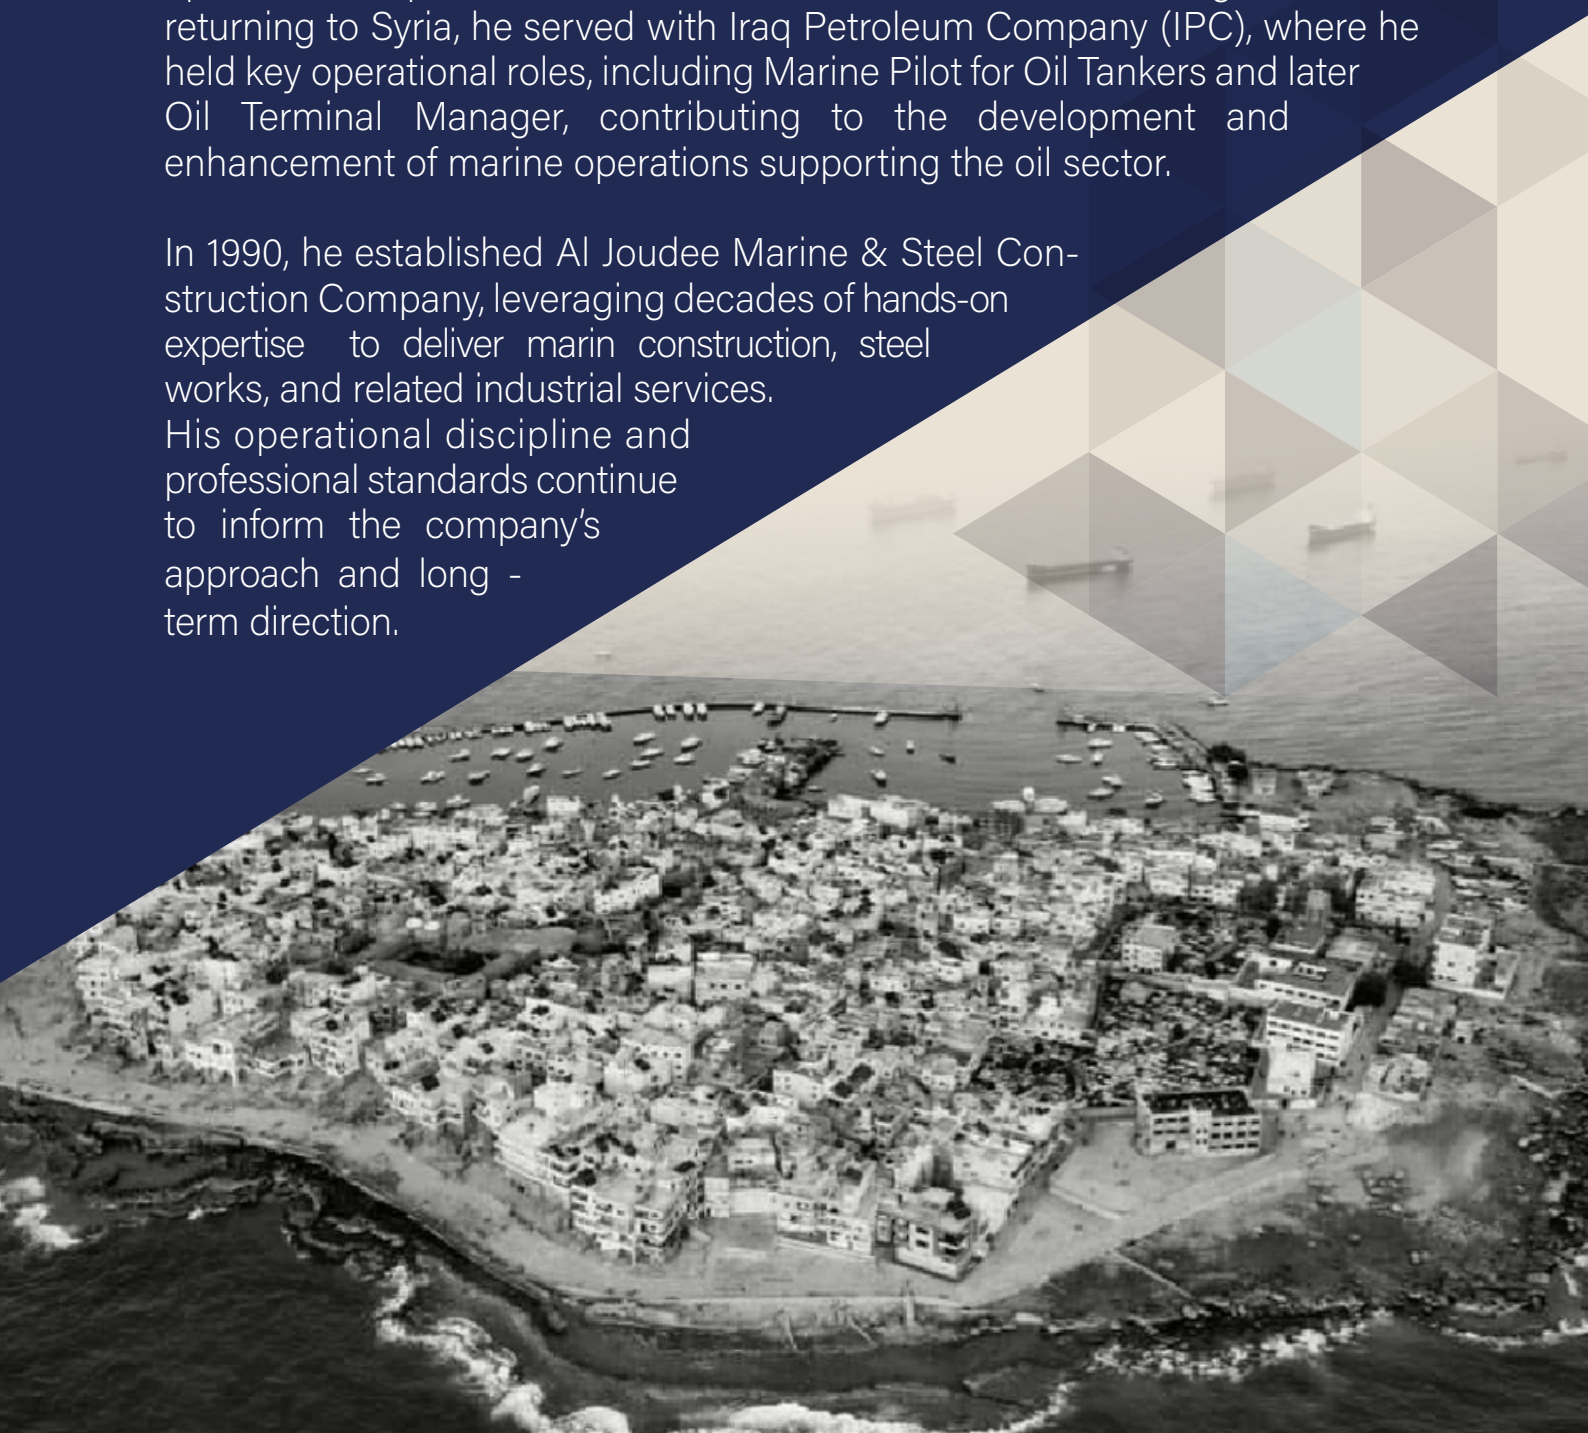

Captain Abdullah Abdulrahman Yahya (1933–2017) was a senior maritime professional and the founder of Al Joudee Marine & Steel Construction Company.

Born on 17 April 1933 on Arwad Island, Syria, he developed an early commitment to maritime operations and navigation. He completed his education in Syria and later continued his maritime studies in the Arab Republic of Egypt, where he graduated with a High Seas Master Certificate of Competency.

He began his professional career as a High Seas Captain, building extensive operational experience in vessel command and marine navigation. After returning to Syria, he served with Iraq Petroleum Company (IPC), where he held key operational roles, including Marine Pilot for Oil Tankers and later Oil Terminal Manager, contributing to the development and enhancement of marine operations supporting the oil sector.

In 1990, he established Al Joudee Marine & Steel Construction Company, leveraging decades of hands-on expertise to deliver marin construction, steel works, and related industrial services.
His operational discipline and professional standards continue to inform the company's approach and long - term direction.

Company Overview

Al Joudee Marine Services Company was established in 1990 by Captain Abdullah Yahya and has since grown to become one of the leading marine and industrial service providers in Syria. The company is strategically located on the Tartous–Banias highway, near the Tartous Oil Port.

Al Joudee provides a comprehensive range of services, including shipbuilding, steel structure repairs, marine salvage operations, port equipment manufacturing, and oil field maintenance services.

Over more than three decades, the company has successfully served shipowners, governmental entities, and oil and gas companies along the Syrian coast and the Eastern Mediterranean. Al Joudee has built a strong reputation for quality, reliability, and professional commitment

Vision

To become a regional leader in marine and industrial services by delivering outstanding quality, high safety standards, and innovative solutions.

Mission

To provide reliable and efficient marine, industrial, and oilfield services in compliance with the highest standards of quality, safety, and professionalism.

Core Values

- Excellence: Striving for the highest quality standards in all operations
- Integrity: Conducting business with transparency, honesty, and credibility
- Safety First: Prioritizing the safety of personnel, assets, and the environment
- Innovation: Adopting smart and practical solutions to technical challenges
- Teamwork: Believing in strong collaboration with employees and clients
- Sustainability: Committing to environmentally responsible practices

Our Services

- **Ship and Steel Barge Construction**
  Design and construction of customized steel vessels and barges, built for durability and operational reliability in demanding marine environments.

- **Marine Salvage Services**
  Execution of marine salvage operations, including towing, refloating, and recovery of vessels in a safe and environmentally responsible manner.

- **Ship Steel Structure Repairs**
  Comprehensive ship repair services, including steel plate replacement, structural reinforcement, and emergency repairs, carried out in port or offshore.

- **Oil Field Facilities Maintenance**
  Integrated maintenance services for onshore and offshore oil facilities, including mechanical works, welding, pipeline installations, and structural repairs.

- **Port Equipment Manufacturing and Maintenance**
  Manufacture and maintenance of a wide range of heavy port equipment, including cranes, mechanical grabs, marine fenders, and steel fuel tanks. All equipment is produced in accordance with high technical standards, with periodic maintenance services to ensure reliable performance in harsh operating conditions.

Completed Projects

Since its establishment, the company has successfully completed numerous projects for public and private sector clients, including:

1. Construction of Small Vessels and Boats: Including petroleum product carriers, freshwater vessels, tanker mooring boats, leisure boats, and marine service vessels, under the supervision of international classification societies such as BV and GL

2. Ship and Boat Repair & Rehabilitation: Hull reconstruction, body repairs, cabins, engines, electrical, mechanical, and wireless communication systems.

3. Manufacture and Maintenance of Marine Buoys and Mooring Systems: For oil tanker berthing and mooring, in various sizes and configurations, including replacement and refurbishment of worn components.

4. Integrated Mechanical and Electrical Works:Engines, generators, pumps, valves, electrical system conversions (DC to AC), and installation of modern lifting systems.

5. Design and Manufacture of Cargo Handling Equipment: Including hoppers for bulk material unloading, hydraulic and mechanical grabs, conveyor systems, and industrial presses.

Completed Projects

6. Oil and Gas Pipeline Projects: Repair, maintenance, and installation of oil and gas transmission lines, including heating networks and thermal insulation systems.

7. Steel Fabrication and Structural Works: Manufacturing of tanks, steel cabins, bridge cranes, vertical cranes, special loaders, and various steel structures.

8. Underwater and Salvage Operations: Including vessel recovery from seabed depths, cutting and transporting marine wreck sections.

9. Engineering Studies and Designs: For vessels, boats, and marine equipment, in addition to the supply and installation of specialized marine and oilfield systems.

10. Support and Operational Services : Manufacturing mobile administrative cabins, maintenance of commercial vessels and livestock carriers, and replacement of diesel and heating systems

Why Choose Al Joudee?

- Over 30 years of marine and industrial expertise
- Highly qualified and specialized technical workforce
- Fast execution with precise and reliable results
- Strategic location near major Syrian ports
- Long-term client relationships built on trust and quality
- Full compliance with safety and environmental standards
